

```
public class Triangle {  
    public static void main(String[] args) {  
  
        int a= Integer.parseInt(args[0]);  
        int b= Integer.parseInt(args[1]);  
        int c= Integer.parseInt(args[2]);  
        boolean isTriangle = (a+b>c)&&(a+c>b)&&(b+c>a);  
        System.out.println( a + " , " + b + " , " + c + ": " + isTriangle);  
    }  
}
```
